

SCSC

Robotics/Steam Camp 2018

The SCSC Robotics/STEAM camp is a free education summer program that emphasizes students' mathematics - science - problem-solving skills and embraces STEAM education as an educational pathway to quality potential careers.

Our mission is to help build students' self-eSTEAM through activities and networking that will demonstrate that ALL students can experience success. Teaming will develop friendships and communication skills through various exercises designed to encourage leadership and cooperation throughout the camp.

Students will participate in various lessons and activities that will challenge them to utilize creative thinking skills, math concepts, technology, art, and engineering. Various activities may involve Spheros, Little Bits, drones, Rube Goldberg machines, and other STEAM projects. Every lesson taught during the camp will be followed by hands-on activities to encourage students to find connections and understanding of the content subject matter being taught.

Camp Dates:

- June 18th - 29th
- Monday through Friday - 8:15 am -11:15 am
