

# Health Career Discovery 2016

Welcome to Schneck Medical Center! This program is for middle and high school students to learn about the many areas of healthcare and how to prepare for a future in the medical field. Featuring a variety of speakers, you will receive hands-on practice in many different departments within the hospital.

A few things to keep in mind this week:

- **Keep PATIENT information PRIVATE.** Please remember what happens in the hospital stays in the hospital. Patient confidentiality is vital to providing the best care possible. All hospitals and doctor's offices adhere to strict HIPAA practices. This means personal health information - who the patient is, what they are here for, and where they are within the hospital - are to be kept secret. Schneck even limits personal health information to only those who need to know to do their jobs or treat that particular patient. However, please feel free to share your own personal experience about this program with others.
- Dress code is casual. Jeans are acceptable, but wear comfortable shoes.
- Please keep cell phones on silent and only check/return messages at break time.
- Please be on-time, even a few minutes early. We have a full schedule and want to be courteous to the other attendees and those giving presentations.
- If you have any questions, feel free to ask!

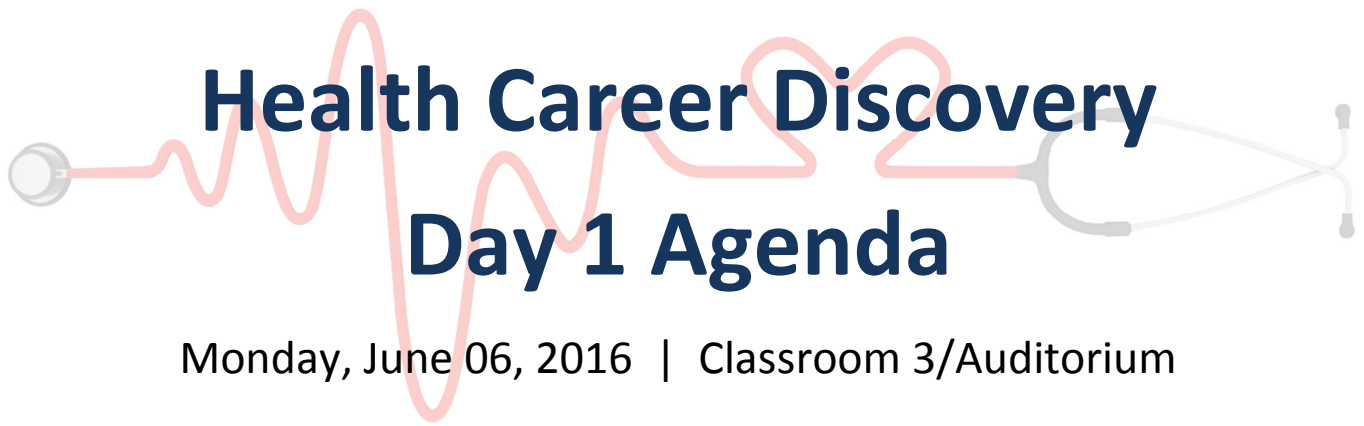

Thank you for joining us!

**SCHNECK**

better healthcare begins here
